

Polyflex[®] Hydro TP

Until now, keeping hands dry in a wet environment could only be achieved by a fully coated glove - this both restricted flexibility and breathability. The Polyflex[®] Hydro TP is a lightweight touch-sensitive knitted glove with a foamed nitrile coating which features a unique Hydro treatment that acts as a liquid barrier minimising water penetrating into the liner. This results in a close fitting, general purpose glove that allows for excellent breathability and efficiency whilst keeping hands dryer for longer while maintaining maximum comfort and dexterity. Modified thermoplastic impact protection to the back of the hand has been carefully engineered to safeguard from impact without restricting movement, and the maximum abrasion resistant foamed nitrile palm coating provides an inherent cushioning effect, increasing resistance to oils, maximising grip and enhancing the longevity of the gloves in use. An adjustable VELCRO[®] wrist strap ensures a secure fit.

Typically used for:

- Scaffolding • Construction Work
- General Assembly
- Oil & Petroleum Operations
- Light Engineering Work
- Tiling & Ceramics
- Port & Container Work
- Logistics • Utilities

Case Quantity:

1 pair per polybag
10 pairs per case

Size	Code
6	PHYTP/06
7	PHYTP/07
8	PHYTP/08
9	PHYTP/09
10	PHYTP/10
11	PHYTP/11
